ABOUT US

A Brief Information About
Luxurro Minerals

We are one of India's leading manufacturers and suppliers of high-quality processed minerals, trusted across industries for our commitment to quality, innovation, and customer satisfaction. Our state-of-the-art facilities and advanced processing techniques ensure consistent product excellence tailored to diverse industrial applications.

Driven by a team of experienced professionals, we uphold the highest standards in every aspect of our operations. We specialize in delivering customized mineral solutions that meet specific client requirements with precision and reliability.

At the heart of our business is a focus on long-term partnerships—providing superior products, dependable service, and unwavering support to help our clients succeed.

OUR PHILOSOPHY

01

MISSION

At Luxurro Minerals, our mission is to consistently deliver high-quality, value-driven mineral solutions that exceed industry standards. We are committed to ensuring customer satisfaction, operational excellence, and sustainable growth through innovation, integrity, and reliability.

02

VISION

To be a globally recognized leader in the processed minerals industry, known for our commitment to quality, innovation, and sustainability—empowering industries worldwide with reliable raw material solutions.

03

CORE VALUES

At Luxurro Minerals, we stand for quality, integrity, innovation, and sustainability. Our values drive us to deliver exceptional products, build lasting partnerships, and support responsible growth across industries.

04

CUSTOMER PROMISE

We promise to deliver consistent quality, reliable service, and tailored mineral solutions that add real value to your business—backed by our commitment to transparency, responsiveness, and long-term partnership.

05

INNOVATION APPROACH

At Luxurro Minerals, innovation drives our pursuit of excellence. We continuously invest in advanced processing technologies and process optimization to enhance product quality, improve efficiency, and meet the evolving needs of global industries.

06

COMPANY PURPOSE

Our purpose is to empower industries with high-quality, responsibly sourced mineral solutions that drive performance, support innovation, and contribute to sustainable industrial growth worldwide.

RESEARCH & DEVELOPMENT

At Luxurro Minerals, R&D drives our commitment to consistent quality, innovation, and performance. We develop advanced mineral solutions tailored to meet the evolving needs of ceramics, glass, paint, and other industries.

FACILITIES & CAPABILITIES

Our labs are equipped with XRD, XRF, SEM, particle size analyzers, thermal analyzers, and pilot-scale units. These allow us to ensure precision, consistency, and product optimization for diverse applications.

R&D Team

Led by expert mineral scientists and engineers, our team works in collaboration with research institutes and client labs to create high-impact, industry-relevant solutions.

CLIENT-CENTRIC INNOVATION

We co-develop custom solutions with clients, improving production efficiency, reducing costs, and ensuring compatibility with evolving technologies.

ACHIEVEMENTS & PIPELINE

We've developed and supplied over 25,000 MT of engineered talc and 35,000+ MT of advanced feldspar and clays to global markets. Upcoming innovations include functionalized fillers and sustainable composites.

PRODUCTS

01 TALC (SOAP STONE)

At Luxurro Minerals, we specialize in supplying high-performance talc known for its exceptional purity, brightness, and consistency. Our talc reserves, located in the mineral-rich belts of Rajasthan, are among the finest in India, known for their high whiteness, purity, and excellent lamellar structure. Owning and operating multiple mines allows us to ensure consistent quality, competitive pricing, and uninterrupted year-round supply.

We currently supply over 25,000 metric tons of talc annually, making Luxurro one of the leading talc suppliers from India. Our talc grades are meticulously processed with advanced screening, grinding, and quality-control technologies to meet global benchmarks. Each batch is tested for key properties such as whiteness, particle fineness, moisture content, and chemical composition, ensuring reliability in performance and consistency in supply.

Our in-house R&D and quality labs ensure every shipment meets international specifications, and our logistics infrastructure supports smooth and timely delivery to clients across India, Asia, the Middle East, and Africa. Backed by deep industry knowledge and a vertically integrated supply chain, Luxurro Minerals continues to be a trusted partner for high-performance talc solutions.

Industries We Serve

- Ceramics
- Paints & Coatings
- Plastics & Polymers
- Paper & Pulp

PRODUCTS

02 KAOLIN

At Luxurro Minerals, we supply high-grade Kaolin known for its superior brightness, fine particle size, and chemical stability. Sourced directly from our own reserves and refined through advanced processing techniques, our kaolin is suitable for a wide range of industrial applications requiring high whiteness and low impurities.

With fully integrated operations, including mine ownership and in-house processing units, we ensure total control over quality and supply. Our current kaolin production capacity supports both domestic and international demand, enabling us to supply bulk volumes with consistent quality and customized specifications.

Our kaolin is trusted by manufacturers across various sectors for its reliable performance and compatibility with high-temperature and high-precision processes. With a strong logistics network and a focus on customer satisfaction, Luxurro Minerals continues to be a preferred supplier of industrial-grade kaolin across global markets.

Industries We Serve

- Ceramics
- Paints & Coatings
- Paper & Pulp
- Rubber & Plastics

PRODUCTS

03 SODA FELDSPAR

Luxurro Minerals supplies high-quality Soda Feldspar, widely valued for its excellent fluxing properties, low iron content, and consistent chemical composition. Sourced from our own mines in Rajasthan, our soda feldspar is carefully processed to meet the exacting standards of various industrial applications where melting behavior, strength, and surface quality are critical.

With complete control over mining, processing, and quality testing, we ensure uniform grain size, high alumina content, and minimal impurities, making our soda feldspar a preferred choice for technical and aesthetic applications alike. Our production capacity enables us to supply over 12,000 metric tons monthly, ensuring reliable service for high-volume requirements both in India and across international markets.

As a vertically integrated supplier, Luxurro Minerals is committed to delivering feldspar solutions that support process efficiency, cost optimization, and high-end product performance. Our material is regularly tested and approved by leading manufacturers worldwide.

Industries We Serve

- Ceramics
- Glass Manufacturing
- Sanitaryware
- Paints & Coatings

PRODUCTS

04 POTASH FELDSPAR

At Luxurro Minerals, we produce and supply premium-grade Potash Feldspar, known for its high potassium content, excellent fluxing ability, and uniform particle size. Extracted from our own mines in Rajasthan, our potash feldspar is processed using advanced technology to ensure consistent chemical composition, low iron levels, and optimal whiteness—essential for high-performance applications.

Our integrated mining and processing operations enable us to deliver over 8,000 metric tons monthly, meeting the large-scale requirements of clients across domestic and international markets.

Luxurro Minerals is a trusted name for potash feldspar supply, offering reliable logistics, technical support, and material consistency that help manufacturers enhance product quality, reduce firing temperatures, and optimize cost-efficiency.

Industries We Serve

- Ceramics
- Porcelain Tiles
- Sanitaryware
- Paints & Coatings
- Frit & Glaze Manufacturing

PRODUCTS

05 BALL CLAY

Luxurro Minerals offers high-quality Ball Clay that is renowned for its plasticity, strength, fine particle size, and excellent binding properties. Sourced from carefully selected deposits and processed in-house, our ball clay is ideal for industries that demand consistency, purity, and superior forming characteristics. With a focus on maintaining low impurity levels and stable shrinkage rates, our material supports high-end ceramic production and other precision applications.

We operate from our own ball clay mines and maintain well-equipped processing units that allow us to supply 5,000 to 7,000 metric tons per month, ensuring both volume scalability and reliable supply timelines. Our clay grades are tailored to meet technical requirements for body formulation, molding, and glaze compatibility across various manufacturing setups.

Luxurro Minerals is trusted by leading ceramic and refractory manufacturers across India, the Middle East, and Southeast Asia. Our vertically integrated model and strong logistics network enable us to deliver high-performance ball clay with consistent quality and dependable service.

Industries We Serve

- Ceramic Tiles
- Sanitaryware

PRODUCTS

05 QUARTZ

At Luxurro Minerals, we supply premium-grade Quartz Powder known for its high silica content, exceptional whiteness, and consistent particle size. Sourced from rich quartz reserves and processed using advanced grinding and classification techniques, our quartz powder is ideal for applications requiring purity, durability, and chemical stability. With low iron content and controlled particle distribution, our material meets the quality standards of both industrial and high-performance applications.

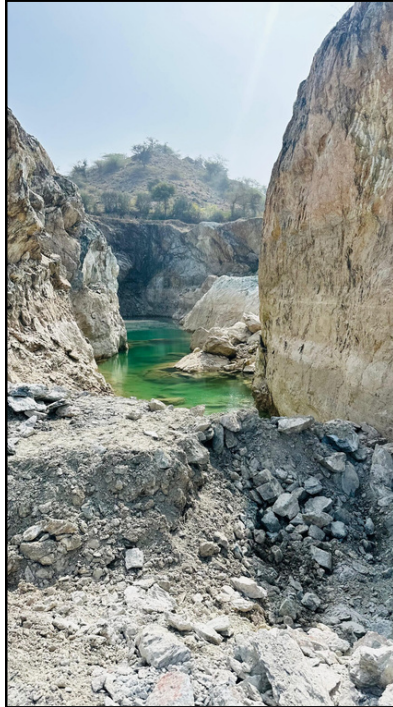

As mine owners with modern processing infrastructure, we ensure dependable monthly supply backed by strict quality control and customizable specifications. Our quartz is available in various mesh sizes to suit specific needs, and is regularly tested to ensure optimal silica content and minimal impurities.

Luxurro Minerals is a preferred supplier for manufacturers seeking high-purity quartz for demanding applications, offering efficient logistics, technical support, and a commitment to quality with every shipment.

Industries We Serve

- Glass Manufacturing
- Ceramics
- Paints & Coatings

OUR GALLERY

EXPORT & GLOBAL NETWORK

Luxurro Minerals is equipped with a comprehensive export infrastructure designed to support efficient, large-scale international trade. With close proximity to key ports such as Mundra and Kandla, we ensure streamlined logistics, minimal transit times, and cost-effective shipping solutions for our global clientele. Our facilities include dedicated export packaging units, container loading docks, and in-house logistics management, enabling us to meet high-volume demands with precision and consistency.

We adhere to all international trade regulations and documentation standards, providing certified quality reports, SDS, TDS, and custom packaging as per client requirements. Our export operations are backed by an experienced team that ensures seamless coordination with shipping lines, freight forwarders, and port authorities to guarantee timely and secure deliveries worldwide.

Today, Luxurro Minerals proudly exports to over 15 countries, including Vietnam, UAE, Saudi Arabia, Bangladesh, Indonesia, Egypt, and Turkey. Our growing presence in global markets is driven by our commitment to product integrity, technical support, and long-term partnerships. With a reputation for reliability and excellence, we continue to be a trusted supplier of industrial minerals across key international manufacturing hubs.
